

**2022 EUROPEAN
CARRIÈRE
SYMPOSIUM**
**MINIMUM TOUCH
ORTHODONTICSSM**

**APRIL
1-2**

**LISBON,
PORTUGAL**

Join us in Portugal for the **5th Annual European Carriere Symposium**, where industry leaders from around the world introduce **Minimum Touch OrthodonticsSM (MTO)** - a new treatment philosophy that blends contemporary clinical principles with advanced digital solutions into a seamless workflow that delivers exceptional predictable results in fewer shorter appointments with reduced treatment times.

During the **European Carriere Symposium**, we will explore how MTO can help you:

- Maintain or grow your case starts and same-day starts (SDS) capacity.
- Attract a greater number of new patients by offering unparalleled convenience with fewer and shorter appointments.
- See fewer patients in person while staying connected virtually, maintaining critical touch points.
- Give your patients a comfortable experience and a brilliant, selfie-ready smile in as few as 11 to 18 months.
- Increase your revenue growth, catering especially to patients who favor convenience and might otherwise opt for direct-to-consumer solutions.

Worldwide Industry Experts

Symposium presentations are delivered in English. Simultaneous translation will be provided during the general session in Spanish, Portuguese, French, and Italian.
